“tailored” platinum products and accessories Made in Italy

88Labware: a new born brand that means development, production, after-sales service of platinum products and accessories for organic and inorganic analysis

8853 S.p.A., leading company in Italy with decades of experience in the field of precious metals and semi-finished products, thanks to its own laboratories fitted with the latest generation technologies and to the continuous search for perfection of its founder **Mario Villa**, is today a reference point also abroad for the quality of its products, all strictly **Made in Italy**.

88Labware is the new branch of this company and it is a synonym for craftsmanship able to supply its customers with tailor-made products for every need: platinum crucibles and accessories for XRF analysis, microanalysis, burning and evaporation (whereas resistance to high temperatures and to chemical attack by acids and fusion mixtures is required).

Crucibles and mini-crucibles, dishes (with or without pouring lips, pins on supporting ring, reinforced rims), **casting moulds, boats, tongs with shot-blasted platinum shoes, mixers, triangles, electrodes** are manufactured in pure platinum or in alloys with Gold, Rhodium, Iridium, Palladium and other precious metals

Capacities and shapes of our crucibles and dishes are suitable for the various types of automatic and semi-automatic analysis machines on the market.

At the same time professionalism, skill and care of each single product allows **88Labware** to meet so different customers' requirements, including platinum coating of non-precious metals crucibles

The strong point of **88Labware** is the customized assistance: from development to production and to after-sales service, every step is followed by **88Labware** technicians in order to provide our customers with a perfect product.

88Labware and Platinum products treatment: an additional service is the recovery of platinum contained in used crucibles. The refined precious metal can be used for further production of new crucibles or purchased by 8853 S.p.A. at actual market metal price.

88Labware will exhibit its products at  analytica in Munich April 1st - 4th in Hall B2 Stand 239

The quality system of **8853 S.p.A.** complies with UNI EN ISO 9001:2008 certified by TÜV. **8853 S.p.A.** is also a member of the RJC (Responsible Jewellery Council) which guarantees the use of "conflict free" metals
